The Applicant's election of the embodiment shown in Figures 21-25 in the reply filed on December 26, 2006, is acknowledged. Because the applicant did not distinctly and specifically point out any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The Applicant did not directly respond to the restriction requirement set forth on page 3, lines 5-8 (Office action mailed on October 4, 2006) but makes reference to Figures 21-25 rather than Figures 17-19 (all of which drawings are associated with the same disclosed embodiment: page 17, lines 12-13, of the specification). Therefore, the examiner infers that the blank rather than the intraocular lens insert has been elected. Claims 2-12 are thus withdrawn from consideration as being drawn to a non-elected invention.

The disclosure is objected to because of the following informalities: At the beginning of the specification, the filing date listed for parent application serial no. 10/142,486 is in error and should read --May 10, 2002--. The filing date of application serial no. 09/372,493 is August 20, 1999, whereas the official date of abandonment for application serial no. 08/764,501 is May 25, 1999, so the two applications do not appear to have been copending at any time. On page 17, line 12, "19B" should be replaced by --19--. On page 18, line 1, "Figs. 17" should apparently be --Fig. 17--. On page 19, line 1, "body 341" is not indicated in the drawings. Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the

Art Unit: 3738

invention. In claim 1, line 2, "the circular opening" lacks a proper antecedent basis; on lines 5-6, "said magnetic ring *and stem*" (emphasis added) lacks a proper antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Avery, US 3,962,505: title; drawings; column 4, lines 41-68; etc. The acrylic plastic material (column 4, lines 8-10 and 26-27) is capable of having threads formed thereon, whether or not such was the intent.
